Adip Krishna Guduru

Hyderabad, India |+91 7799718000 | guduruadip@gmail.com

Currently pursuing my Bachelor's of Technology from Woxsen University, with a major in Computer Science Engineering, and a specialisation in Artificial Intelligence and Machine Learning. I am a Technophile who loves exploring all areas of the domain, with most recently, machine learning, computer vision, and natural language processing.

SKILLS

- Advanced Python
- Machine Learning
- Computer Vision
- Natural Language Processing
- Communication
- Collaboration
- Leadership
- Digital Marketing

EDUCATION

Bachelor’s of Technology

Major in Computer Science Engineering,
Specialisation in Artificial Intelligence and Machine Learning

Woxsen University, 2022 - 2026

Summer Semester @ NTU, Singapore

BC2406 Analytics 1: Predictive and Visual Techniques | A-
DS5004 Design and Systems Thinking | B

Nanyang Technological University, Singapore, June - July 2024

RESEARCH

Sustainable Solutions for E-Waste and Development

Book Chapters, Approved Aug 2023 - Oct 2023, Published Feb 2024
DOI: 10.4018/979-8-3693-1018-2

Chapter 15
Opportunities and Challenges in Solar Photovoltaic Waste Management
Chapter 18
Technological Advancements in E-Waste Management and Resource Recovery
How Al and Emerging Technologies Are Revolutionizing E-Waste Recycling

---

iHub-Data Mobility Fellowship

Research Grant from IIIT Hyderabad, Approved Jun 2024

Data-Driven Transportation Analytics
Multi-Modal Data Fusion with Predictive Modeling Towards Enhanced 2W Safety

---

CLUB EXPERIENCE

Technology Club

Executive | Oct 2022 - Apr 2024
President | May 2024 - Apr 2025

PROJECTS

PROJECT ACHIEVEMENTS

Pothole Detection

VBIT National Level Hackathon

1st Position Winner

Hyderabad, Feb 2023

Project Overview

We built a Pothole Detection system to proactively address road maintenance needs. Cameras capture road images, which are analyzed by a neural network trained on extensive pothole data, to detect potholes and calculate a risk factor based on their size. This risk factor is then updated onto a centralised database.

Technology Stack

- *Front End (Javascript):* React JS, Vue
- *Back End (Python):* OpenCV, NumPy
  - YOLOv4 Tiny: Pre-trained deep learning model for object detection, specifically trained to identify potholes.
  - DetectionModel: OpenCV wrapper for loading and using the YOLOv4 Tiny model for detection.
- *Database:* MySQL

ParQuik

OIST National Level Hackathon

Most Innovative Implementation

Bhopal, Oct 2023

Project Overview

ParQuik is a smart parking ecosystem that is revolutionizing the way we approach parking, making it more efficient and user-friendly. It addresses the common parking challenges that we all face, such as congestion, inefficient space usage, and complex payment processes. ParQuik provides a smart parking solution that streamlines the entire process, making parking more convenient and hassle-free for everyone involved.

Technology Stack

- *Frontend:* Flutter, Figma
- *Backend (Python):* QR, OpenCV
  - Pickle: Image analysis and processing
  - CVzone: Object Detection
- *Database:* NoSQL using Google Firebase

Verdict AI

Hyderabad, Nov 2023

Project Overview

Verdict AI is a machine learning tool designed to forecast court case times, therefore streamlining the legal process. Judges' time can be better utilized concentrating on more complex matters by using Verdict AI to identify cases that are likely to be settled or dismissed early. Each verdict's specific confidences are calculated by the model, and this information can be utilized to forecast how long the verdict will take.

Technology Stack

- *Frontend (Python):* Streamlit
- *Backend (Python):* Transformers: BERT
  - Beautiful Soup: Data Scraping of web pages
  - Tokenisations
- *Database:* NoSQL using MongoDB

WORK EXPERIENCE

Digital Communications Crew Executive, Woxsen University

Hyderabad, Aug 2023 - Apr 2024

Project Overview
At the Digital Communications Crew, we aimed to enhance the brand image of Woxsen University while creating a interactive online community for its students using creative content and innovative marketing strategies. I utilized analytics tools to measure the effectiveness of digital marketing campaigns, wielding data insights to refine strategies and maximize impact.

Key Responsibilities

- *Strategic Digital Marketing*
- *Engaging Content Creation*
- *Data-Driven Optimization*

Chief Editor, AKPsi, Queen Mary University of London

Remote from Hyderabad, Jan 2024 - Mar 2024

Project Overview
Edited podcasts at Queen Mary's AKPsi, honing episodes on international business and tech for clarity, coherence, and impact. My editing and creativity enhanced the listening experience, ensuring each episode resonated with the target audience. I maintained strict adherence to production schedules and deadlines, prioritizing tasks effectively. I also researched and implemented solutions for technical challenges related to audio and video production.

Key Responsibilities

- *Audio & Video Editing*
- *Content Development & Collaboration*
- *Project Management & Technical Support*

Intern, AI Research Centre, Woxsen University

Hyderabad, Feb 2024 - May 2024

Project Overview
Conducted research at the AI Research Centre, focusing on improving Human-Machine Interfacing. Worked on a solution to translate Indian Sign Language into speech using Computer Vision, Text-to-Speech, and Machine Learning. Our work aimed to bridge communication gaps the users of Indian Sign Language and the general public. My contributions included developing a proof of concept and applying research to refine the system for practical use.

Key Responsibilities

- *AI Model Development & Integration*
- *Research & Solution Design*
- *Project Coordination*
